

# VIGNESHWARAN V

Full-Stack Developer | Cyber Security Engineer | Linux System Administrator  
vigneshwaranvicky9091@gmail.com | +91 87787 87474 | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

## PROFESSIONAL SUMMARY

Computer Science Engineering student (Cyber Security specialization) at Sri Sai Ram Institute of Technology with hands-on expertise in Full-Stack Web Development and Cyber Security. Proficient in Java, Python, JavaScript, React.js, and modern web technologies. Experienced in building secure, scalable web applications and conducting penetration testing using industry-standard tools. Holds Red Hat Certified System Administrator (RHCSA) Certification. Completed 2 technical internships with demonstrated impact in agile team environments.

## EDUCATION

**Sri Sai Ram Institute of Technology** Chennai, India | Sep 2023 – May 2027  
Bachelor of Engineering – Computer Science Engineering (Cyber Security Specialization)

**Vivekananda Matriculation Higher Secondary School** Chennai, India | Jul 2022 – May 2023  
Higher Secondary Certificate (HSC)

**Vivekananda Matriculation Higher Secondary School** Chennai, India | Jul 2020 – May 2021  
Secondary School Leaving Certificate (SSLC)

## CERTIFICATIONS

| <b>Ethical Hacking 101</b> - Simplilearn                                                    | Dec 2024   |
| <b>Software Conceptual Design</b> - NPTEL                                                   | April 2024 |

## PROFESSIONAL EXPERIENCE

### Web Development Intern - Logritha Technologies Jun 2025 – Jul 2025

- Developed BridgeLoop, a full-stack e-learning platform using HTML5, CSS3, JavaScript, PHP, MySQL, and XAMPP, supporting 3 core modules: user authentication, course enrollment, and personalized dashboards.
- Implemented responsive web design and REST-based backend APIs, improving cross-device compatibility across 5+ browser/device combinations and reducing reported UI defects by ~40%.
- Optimized MySQL queries and backend performance, achieving faster average response times for database-heavy pages with 100+ concurrent test sessions.
- Applied secure software development practices including password hashing, input validation, SQL injection prevention, and session management, reducing security vulnerabilities across 3 major OWASP categories.
- Collaborated in an Agile team environment using Git and GitHub for version control, code reviews, debugging, testing, and deployment across 15+ sprint commits.

### Linux System Administrator Intern - Vectra Technosoft Pvt Ltd Jan 2026 - Feb 2026

- Completed enterprise Red Hat Enterprise Linux (RHEL) internship with hands-on experience in Linux system administration and network administration for production server environments.
- Managed Linux user/permission administration, log monitoring, disk partitioning, and process management across multi-server setups, ensuring 99%+ system uptime during the internship period.
- Deployed and managed Docker containers for application isolation, reducing environment setup time by approximately 60% compared to manual configuration.
- Earned the RHCSA (Red Hat Certified System Administrator) certification, validating proficiency in Linux administration, networking, automation scripting, and server configuration.

## PROJECTS

---

### BridgeLoop | HTML5, CSS3, JavaScript, React.js, TypeScript, MySQL, Git

Jun 2025 – Present

- Architected and developed a production-grade full-stack e-learning platform featuring secure user authentication (JWT + session management), dynamic course enrollment, and personalized dashboards.
- Designed fully responsive, cross-browser-compatible UI using HTML5, CSS3, and JavaScript, ensuring WCAG accessibility compliance across mobile and desktop devices.
- Implemented secure backend with password hashing, parameterized queries, input sanitization, and database optimization (PostgreSQL/MySQL), improving query performance by ~35%.
- Integrated RESTful APIs tested via Postman; managed codebase with Git/GitHub using feature-branch workflow across 50+ commits.

### SHEild | HTML5, CSS3, Vanilla JavaScript, PWA, Service Worker, Web App Manifest

Feb 2026 – Present

- Built a Progressive Web Application (PWA) for personal safety featuring emergency access tools, a secure encrypted vault, emergency contact management, and real-time safe-zone awareness.
- Implemented offline-first functionality using Service Workers and Web App Manifest, enabling installable app-like experience with full offline access on both iOS and Android devices.
- Designed a lightweight, secure front-end architecture in Vanilla JavaScript focused on accessibility, performance optimization (Lighthouse score 90+), and zero-dependency security for sensitive user data.

## TECHNICAL SKILLS

---

**Languages:** Java, Python, C, JavaScript

**Front-End:** HTML5, CSS3, React.Js, Progressive Web Apps, Service Workers, Web App Manifest, Responsive Design

**Back-End:** REST APIs, Session Management, Authentication (JWT)

**Databases:** MySQL, PostgreSQL (PgAdmin), MongoDB

**Cyber Security:** Ethical Hacking, Penetration Testing, OWASP, Wireshark, Nmap, Metasploit, Burp Suite, Web Exploitation

**DevOps & Tools:** Git, GitHub, Docker, Linux (RHEL), XAMPP, VS Code, Postman API

**Concepts:** Object-Oriented Programming (OOP), DBMS, Operating Systems, Computer Networks, Agile/Scrum
